OH RFC: “I wanna”

mediacurrent

"I don't want Dreamweaver, but I must be able to do everything in it that I can with, you know, Dreamweaver."

“I wanna”

mediacurrent

- Select from specific layouts
- Customize each thing
- Add new CSS
- Add new JS

..

- Without any codebase changes

mediacurrent

Stability

- Exportable
  - Via Features.

  - Manually via hooks.

Keeps going

- Crazy-configurable.
- Caching options.
- Extensible.
- Stable.
- Extensive permissions flexibility.
- Lots of support from other modules.

mediacurrent

Not quite there..

Needs moar awesome

- Difficult UX
- Not suitable for non-technical

- Can’t change per page
  - … without going crazy

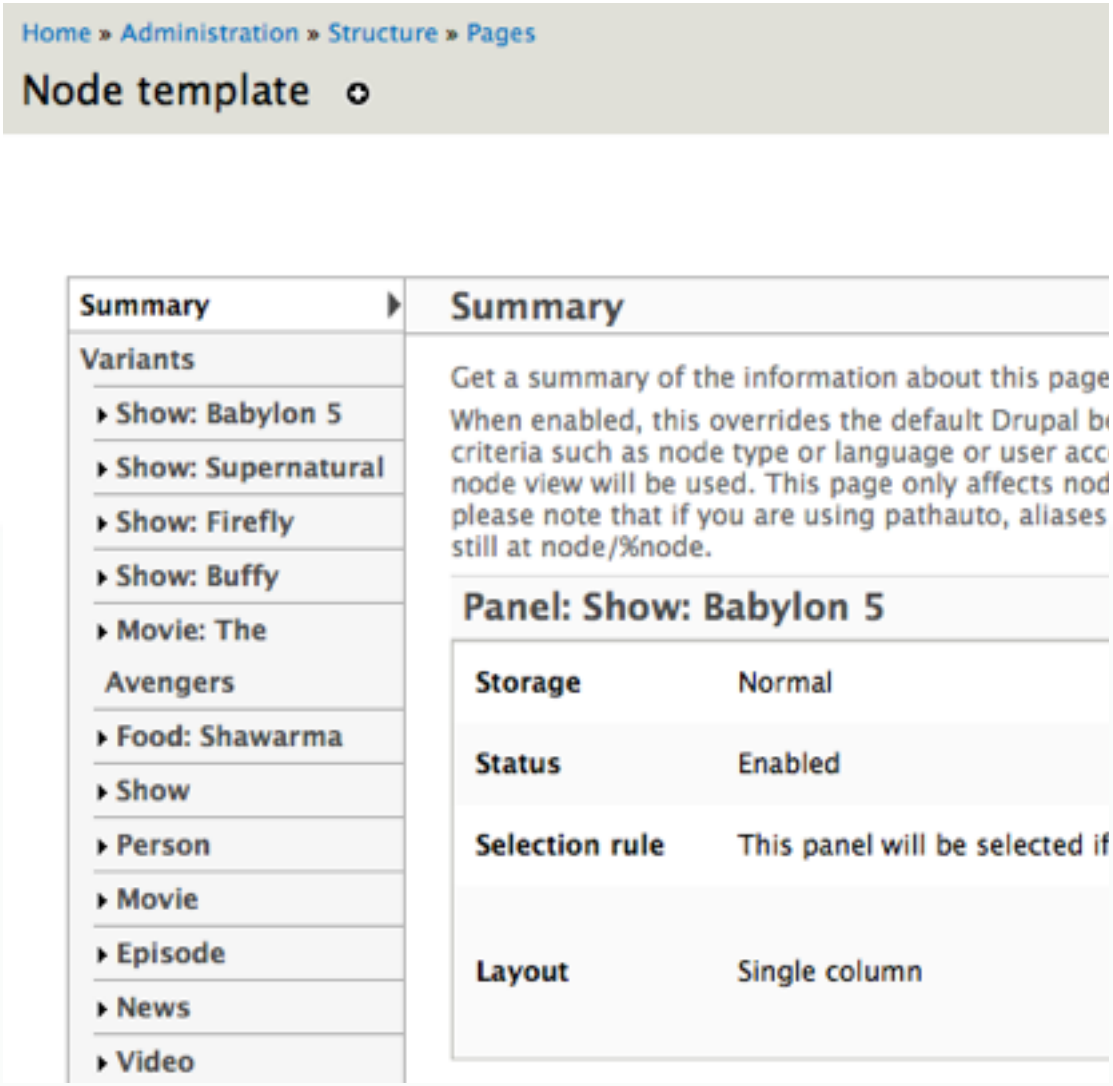
Use cases

- Customize individual pages
- Customize groups of pages
- e.g. customize CEO's page
- e.g. customize special event
- e.g. custom "special sale" product

Variants Of Doom™

mediacurrent

- Nightmare!



mediacurrent

Introducing Panelizer

Panelizer

- Any Drupal “sub-thing”
  - Entity bundles
  - e.g. content types, vocabularies
- Any view mode
- Multiple displays
- Each object customizable

Any Drupal “thing”

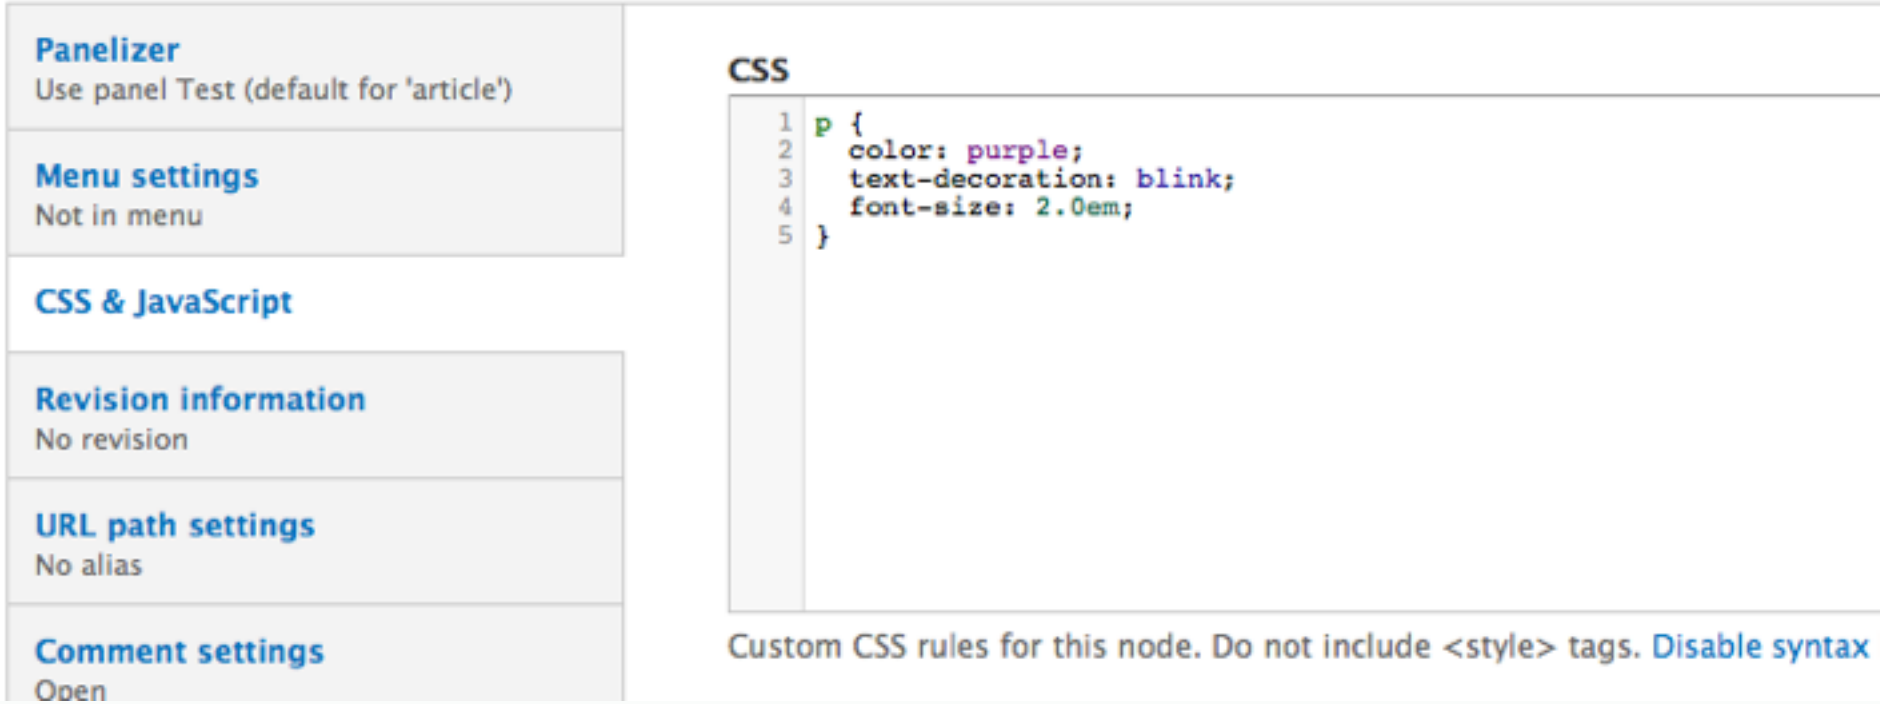
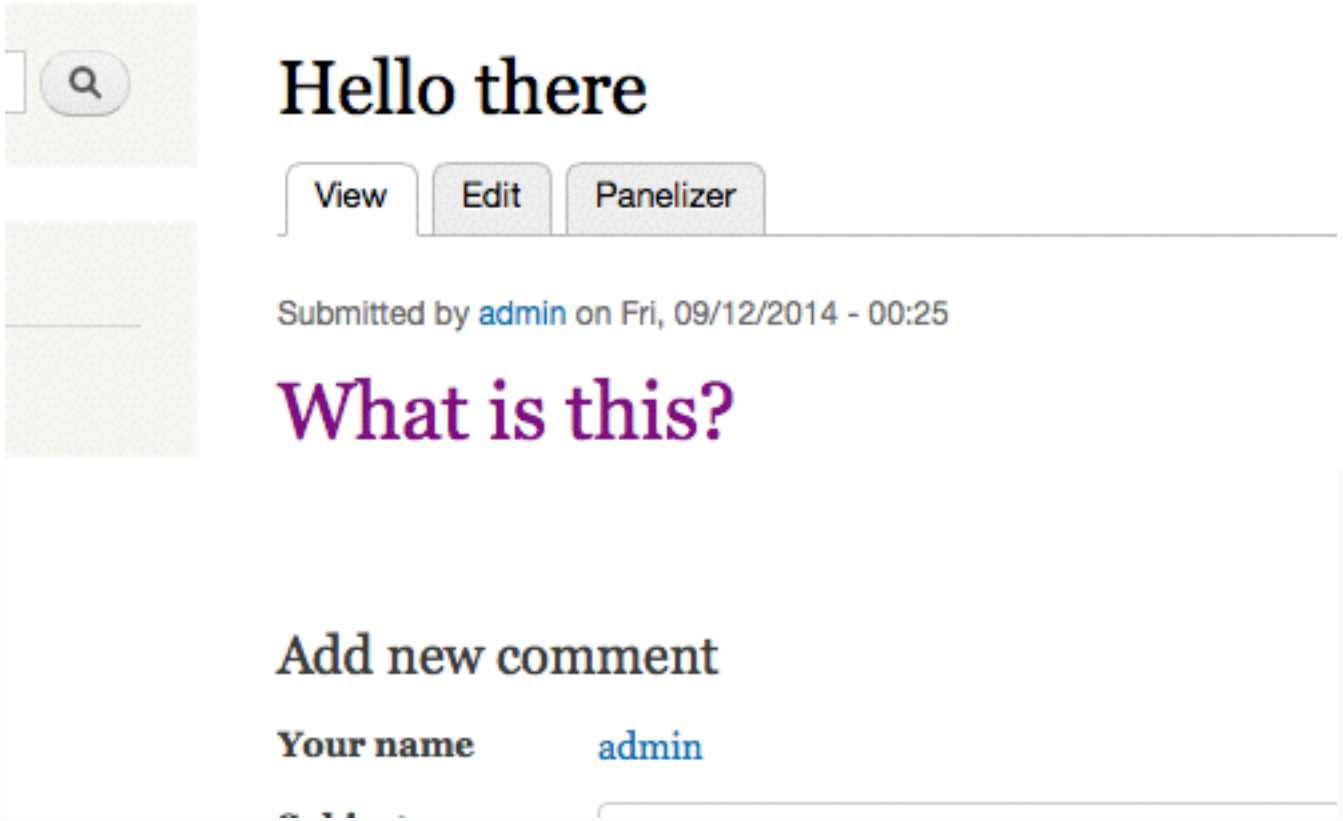
“But what about my CSS?”

Code per Node



Code per Node



Lots of options

- Default per content type
- Selectable view modes
- Syntax highlighting
- Tokens
- CSS per block
- Permissions

Global value...

GLOBAL CODE (OPTIONAL)

Optionally load custom code on every page. Note: it is **strongly advised to not use this**, instead it **this code should be added to the theme**. These options **could lead to security problems** or **cause parts of the site to malfunction**. Make sure to test all changes on a copy of the site before trying on a live/production site. Also, note that this code will *not* be wrapped using the code above. You have been warned.

GLOBAL CSS

☐ I accept responsibility for this code.

Custom tokens may be added to the code to output certain information.

Browse available tokens.

I didn’t say this, but..

There may be trouble ahead!
